

Medicare Managed Care Enrollment and Payment Conference

Each year the Center for Medicare and Medicaid Services (CMS) holds a Medicare Managed Care Enrollment and Payment Conference for Medicare Managed Care organizations. These Managed Care Organizations, Medicare Advantage and Prescription Drug Plans, contract with CMS or have pending applications to provide health care to Medicare beneficiaries.

The conference will include, but is not limited to, an explanation of the contract application process, an overview of the requirements for sending enrollment and disenrollment records to the Center for Beneficiary Choices (CBCs), how to access the CMS Data Center, how to reconcile plan's records to CMS records, updates on legislation, review of system data bases and reports, and small group training sessions. At this conference, participants will be provided with an understanding of CMS's managed care enrollment and disenrollment and payment processes. An underlying goal is to insure better services to beneficiaries by providing Plans with the latest training and most recent health care information.

The conference is scheduled from August 29th through September 2nd, 2005 and will be held at the Hyatt Inner Harbor Hotel in downtown Baltimore Maryland.
